

ABSTRACT OF THE INVENTION

A lift-type positioning structure for a lid of a bracket of a computer interface card has a housing, a seat member, a lid and a positioning structure. The housing has a receiving slot for receiving the interface card, a rectangular slot over the receiving slot, and a horizontal platform extending perpendicularly
5 from a lower edge of the rectangular slot. The seat member is mounted to the housing at an edge of the rectangular slot. The lid is pivotally connected to the seat member to be lifted up or down. The positioning device is operative to secure the lid at an open position.
